Collection Letters

Definitions/Documents Definition->Parameters->Documents

Definition->Security->Users

There is a new option on the Documents Parameters Page called Collection Letters.

cument Types			Patient Images		
Insurance Cards:	INSURANCE CARD	~	Image Resolution:	640 × 480 Image Quality	: 100 🜩

Practices can use this new option to define a Document type for collection letters. If this is enabled, there will be a new folder on the billing side of the patient chart called Collection Letters. This folder will display any document that is assigned to this document type. It is important to note that these document will still be displayed in the Documents folder, the Collection letters section is simply a away to separate them out from the rest. In addition, there is a new security option in the Patient Access section that corresponds to this new Collection Letters section.

Sections	Patient Chart Access				
User Identification	Alerts:	Allow	ORead	ODeny	
System Windows	Allergies:	Allow	ORead	ODeny	
Practice Manager	Care Plan:	Allow	ORead	ODeny	
Biller's Desktop	Charting:	Allow	ORead	ODeny	
Scheduler	Clinical Research:	Allow	ORead	Deny	
Collector	Collection Letters:	Allow	ORead	ODeny	
Reports	Comments:	Allow	ORead	Deny	
Fee Table Facility	Correspondence:	Allow	ORead	ODeny	
Patient Flow	Documents:	Allow	ORead	Deny	
Write-Off Facility	General Encounter Info:	Allow	Read	Deny	
Posting	Guarantor:	Allow	ORead	ODeny	
Patient Definition	Hospitalizations:	Allow	ORead	ODeny	
Patient Access	Injections:	Allow	ORead	Deny	
Functions	Ink Documents:	Allow	ORead	ODeny	
Prescriptions	Inquiry:	Allow	ORead	ODeny	
Patient Medication	Insurance:	Allow	ORead	ODeny	
VertexDr	Medications:	Allow	ORead	ODeny	
VertexDr Explorer	Messages:	Allow	ORead	ODeny	
Third Party Addins	Narrative:	Allow	ORead	ODeny	
VertexDr Misc	Notes:	Allow	ORead	ODeny	
VertexDr Documents	Order Sets:	Allow	ORead	Deny	
Mail Merge	Orders:	Allow	Read	Deny	
Radiology	Personal:	Allow	Read	Deny	
Clinical Research	Pharmacies:	Allow	Read	Deny	
	PMFSH:	Allow	Read	Deny	
	Problem List:	Allow	Read	Deny	
	Quality Guidelines:	Allow	Read	Deny	
	Shots:	Allow	Read	Deny	
	Specialty Providers:	Allow	Read	Deny	
	Status:	Allow	ORead	Deny	
	Tasks:	Allow	ORead	Deny	
	Vaccinations:	Allow	ORead	Deny	
	Vitals:	Allow	Read	Deny	

By default, this new security option is set to Allow. As a side note, users may still be able to see the collection letters in the documents section of the chart where their settings are defined to Allow for Documents but Deny for Collection Letters. Setting Deny on the collection letters will only deny that section of the patient chart, not the inherent documents themselves.

Parameters/Collections

Definition->Parameters->Collection Parameters

There is a new option in the External Collection Agencies section of the Collection parameters called Extract with Headers. When a user performs a Transfer Accounts to External Collections, and this parameter is enabled, the csv file will now contain headers for every column.

Collection Definition Define the collection paramet	on er defaults for the sy	/stem.		
Sections	Collection Ag	ency Parameters		
Default Loading	Agency 1:	CAPITOL ACCOUNTS	Agency 1 Code:	ACOLL
- Collection Letters - External Collection Agencie	Agency 2:		Agency 2 Code:	
Application Behavior	Agency 3:		Agency 3 Code:	
- Class Loading - Automated Settings	Agency 4:		Agency 4 Code:	
	Agency 5:		Agency 5 Code:	

In addition, Columns have been added for the following fields (regardless of the parameter setting):

Insurance Payment

Patient Payment

Adjustments

Lastly the provider name column has been split to display the First Name, Last Name, and Middle Initial in individual columns accordingly.

Note: This feature is only available to those clients using the Collection Module.

Transaction Write Off

Users can now filter by the following criteria when performing a Transaction Write Off:

- Modifiers
- Rendering Providers
- Referring Providers
- Diagnosis Codes

Note: It is important to note that if a field criterion is not specified, the system will default to ALL.

Mass Resubmission

Users can now filter by the following criteria when performing a Mass Resubmit:

- Financial Class
- Diagnosis Codes
- Modifiers
- Divisions

Note: It is important to note that if a field criterion is not specified, the system will default to ALL

Transaction Update

Place of Service

Users now have the ability to update Place of Service (POS) within the Transaction Update window.

· · · · · · · · · · · · · · · · · · ·	
he update will only be p	ate erformed on transactions that fall within all of the indicated parameters.

Import Facility

Import Facility Suspense Posting Area

When in the Import Facility, users can now choose to release charges by Create Date. As the name applies, this option will release all charges from suspense, regardless of user or provider, that were created during the designated date range.

Mail Merge Letters

Mail Merge Letter

When selecting a Mail Merge letter template users can now select the *Add More* option from the bottom of the window. When selecting this option, the system will bring up the Mail Merge letter as it normally does, however, when the letter is saved and closed, the user will be brought back to the Mail Merge template selection window where he/she can select an addition letter to be created.

Note: The Add More button will only be available when creating a Mail Merge letter when highlighted on an Encounter or while in Charting.

Billers Desktop

Pending Notes Queue

The user may now print a UB-04 for the selected records in the Claims Pending Notes queue. A message box has been added if a patient does not have any open transactions when trying to print a UB-04.

Note: Billers Desktop is only available based to selected users.

Prescription Writer

Rx Writer

In the RxWriter, on the Favorites tab, two new columns have been added:

- Formulary Status
- Representative NDC Code

These fields will display to formulary status for the drug favorite (where applicable) and the NDC Code for the drug respectively.

Rx Writer Secondary DEA

When in the Rx Writer, if the provider has multiple DEA numbers, the system will display a DEA dropdown under the Provider name, allowing the provider to select the DEA number that he/she needs to send the prescription. This field will be defaulted to the DEA number in the Provider Definition record. It will automatically change if the state of the pharmacy that is selected matches that of a secondary DEA record for that provider.

SIG Builder & Quantity Description

Bottle and Tube are no longer available as Quantity Descriptions for prescriptions. All Liquid and Gel prescriptions will now default to Milliliters as the Quantity Description.

Definition/Pharmacies

When searching for a pharmacy by name, the results for the search string will be resulted first and then all other Mail Order Pharmacies will be resulted after the initial search results.

Definition/Prescriptions

Definitions->Security->User

When the Enable Simple Sig Definition on Form option is enabled, the user will see a green "+" icon on the Sig Route, Sig Frequency, and Sig Other fields on the sig builder window.

ABILIFY MAINTENA 300 MG	INTRAMUSCULAR INJECTION, EX	TENDED RELEASE				:	×
